

STABLE LIFE

Stable Life

BUILDING HOPE...

CURRENT NEEDS:

- Monthly financial support
- Looking for 15-20 acres of land to expand
- Financial support with equine medications, feed, hay, etc.

Welcome to the Spring season! We are looking forward to the warmer weather and fun activities outdoors. Before we jumpstart this exciting time, let's reminisce on what God did throughout the winter months.

StableFit: StableFit has been running at a consistent pace for the past few months. Coach Ken runs approximately 5-6 classes per day. Now that baseball season is in swing for Riley (Ken and Kelly's son; a senior in high school) Ken's last gym class ends at 4:30pm to ensure that he makes it to the baseball games on time.

Equine Facilities: Our equine program is continuing to grow. We are currently at full capacity with the amount of horse lessons we host each week, so we

have created a waiting list for those who hope to gain a time-slot. We had a lot of rain this winter, so we did our best to squeeze in as many horse lessons as possible despite the weather.

Respite: We continue to provide respite care for families as well. We are also providing transportation for several of our clients. We currently work with 8 respite clients. We are excited to welcome Gabriel Dinn to our respite family!

Farm Life: We welcomed five new baby chicks to our flock! This brings our total to eight chickens. Our horses are doing well despite the rainy weather we have been having. Colin, Ransom, and Sage (Madison

and Caleb's dog) are living their best life on the farm. And our barn cat, Pumpkin, is thriving and enjoys all of the attention he receives each day.

If you noticed, a tractor is off of our needs list! The Lord allowed Stable Life to purchase a Massey Ferguson tractor! We have already used this tractor to repair a fence, move hay around, and bury the electric fence cable.

Construction: The construction of our poll barn is still underway! All of the posts are in the ground along with the supports around the top. The next step is the hang the trusses, and put the roof on. We looking forward to finishing this project and using the poll barn within the next few months!
